

# Computer Concepts

## Creating a Folding Restaurant Menu

Thursday, October 8, 2009 – 6<sup>th</sup> Block

In your last few assignments you have learned how to format text, set margins, use styles, use tabs, and many other features. This project is going to require you to use what you have learned and create a basic menu for a restaurant. You will be graded on your creativity and use of the techniques you have learned. I have not provided you a template to use because I want you to be creative and not rely on an idea from anyone else.

*Make sure that your menu is laid out in the following ways:*

- Landscape orientation
- .4" margins on each side
- Fold in the middle
- Print on both sides
- Uses tabs

*Due date: Tuesday, October 13, 2009: End of the Period*
