

Web Banner Project

First, do some web research to discover the 3 most popular types of file formats that are used for graphics on the internet. What are the differences between the formats? Why would you use one instead of the other? Type your findings in Microsoft Word and share it with me on Google Documents.

Second, create the following graphics and store them in your Pipher – Ready to Grade folder.

1. Create a banner with the following specifications:
 - 450 X 200 pixels
 - 100 pixels/inch resolution
 - 5 layers or more
 - File format: JPG
 - Topic: your favorite music group or singer

2. Create a banner with the following specifications:
 - 1200 X 400 pixels
 - 125 pixels/inch resolution
 - 5 layers or more
 - File format: GIF
 - Topic: your favorite hobby or interest

3. Create a graphic with the following specifications:
 - 500 X 500 pixels
 - 80 pixels/inch resolution
 - 5 layers or more
 - File format: JPG
 - Topic: your favorite subject in school
